

Name: Pratyush Tamrakar

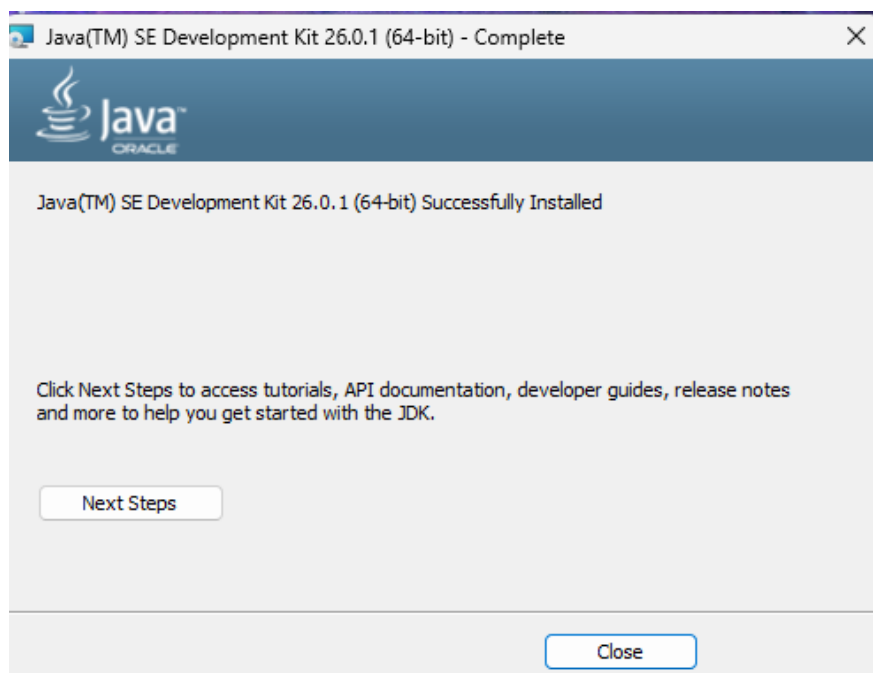

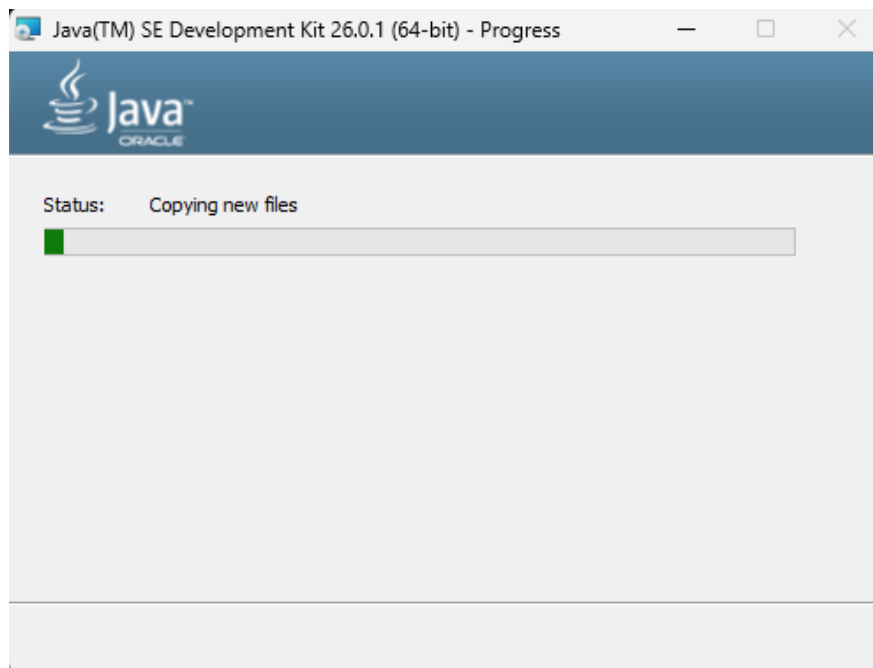

Section: B

Subject: OOP (Tutorial-1)

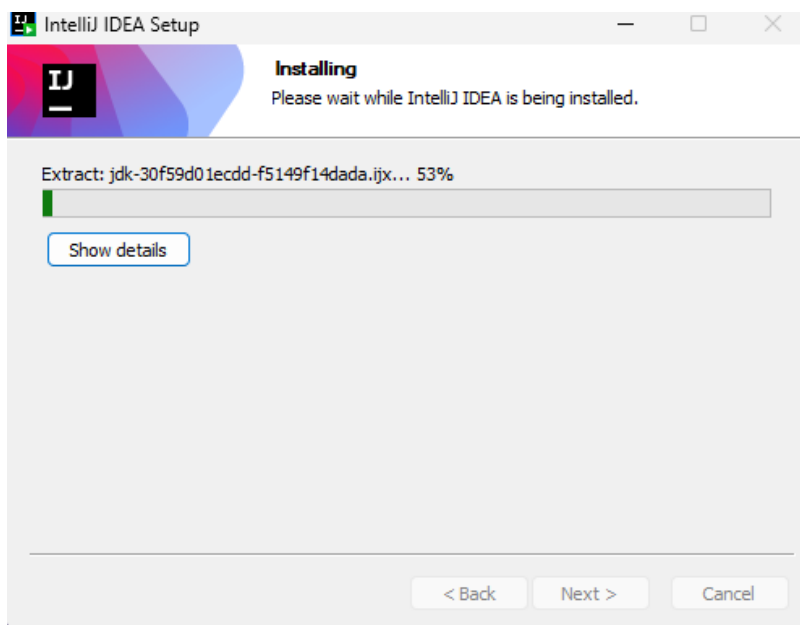

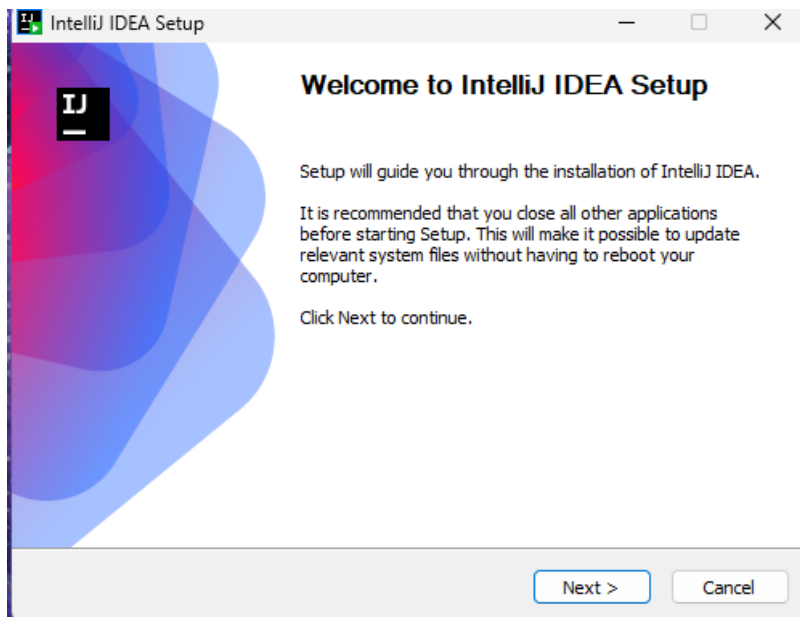

SCREENSHOTS OF TUTORIALS

1)Download JDK(java development kit)

2)Download IntelliJ(text editor)

3)Checking the java version

```
Command Prompt
C:\Users\tamra>java --version
java 26.0.1 2026-04-21
Java(TM) SE Runtime Environment (build 26.0.1+8-34)
Java HotSpot(TM) 64-Bit Server VM (build 26.0.1+8-34, mixed mode, sharing)

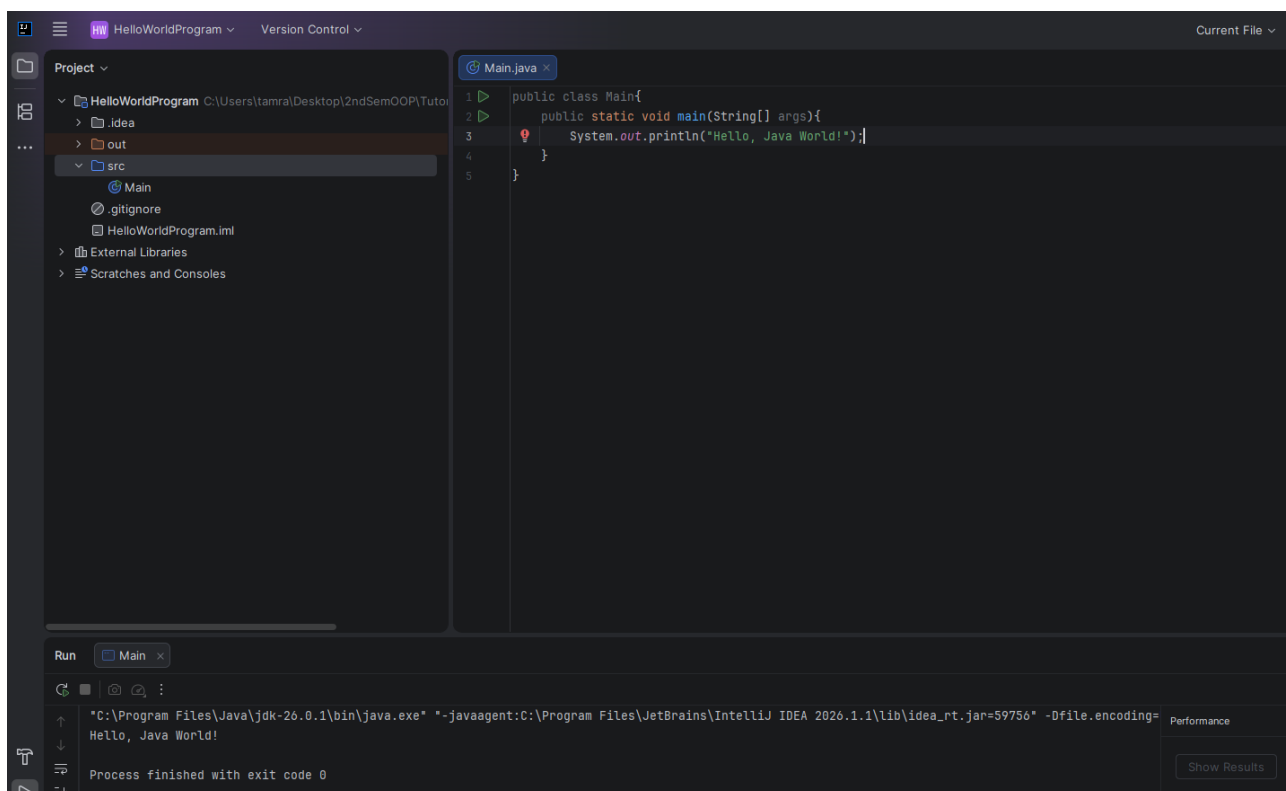

C:\Users\tamra>javac --version
javac 26.0.1
```

4) Program and their outputs.

A) Hello Java World

A. Hello World Program

```
public class Main{  
    public static void main(String[] args){  
  
        System.out.println("Hello, Java World!");  
    }  
}
```

B) Variables and DataTypes

B. Variables & Data Types

```
public class Main{  
    public static void main(String[] args){  
  
        int age=19;  
        double result=56.2783;  
        boolean alive=true;  
        char gender='M';  
        String name="Pratyush Tamrakar";  
  
        System.out.println("Age(Integer):"+age);  
        System.out.println("Result(Double):"+result);  
        System.out.println("Alive(Boolean):"+alive);  
        System.out.println("Gender(character):"+gender);  
        System.out.println("Name(String):"+name);  
    }  
}
```

The screenshot displays the IntelliJ IDEA IDE interface. The top-left pane shows the project structure for 'VariablesAndDataTypes', with the 'src' folder expanded to show the 'Main' class. The top-right pane shows the code for 'Main.java', which is identical to the handwritten code in the previous block. The bottom pane shows the 'Run' output, indicating that the program executed successfully. The output text is as follows:

```
"C:\Program Files\Java\jdk-26.0.1\bin\java.exe" "-javaagent:C:\Program Files\JetBrains\IntelliJ IDEA 2026.1.1\lib\idea_...  
Age(integer):19  
Result(double):56.2783  
Alive(boolean):true  
Gender(character):M  
Name(String):Pratyush Tamrakar  
Process finished with exit code 0
```

C) Operators

C. Operators

```
public class Main {
    public static void main(String[] args) {
        float a = 20;
        float b = 9;

        System.out.println("----- Arithmetic Operator -----");
        System.out.println("a + b:" + (a + b));
        System.out.println("a - b:" + (a - b));
        System.out.println("a * b:" + (a * b));
        System.out.println("a / b:" + (a / b));
        System.out.println("a % b:" + (a % b));

        System.out.println("----- Relational Operator -----");
        System.out.println("a > b:" + (a > b));
        System.out.println("a < b:" + (a < b));
        System.out.println("a == b:" + (a == b));
        System.out.println("a != b:" + (a != b));

        System.out.println("----- Logical Operator -----");
        int age = 20;
        boolean ID = true;
        if (age >= 18 && ID) {
            System.out.println("Allowed Entry");
        }
        if (age < 18 || !ID) {
            System.out.println("Not Allowed");
        }
    }
}
```

```
1 public class Main{
2     public static void main(String[] args){
3         float a=20;
4         float b=9;
5
6         System.out.println("-----Arithmetic Operators-----");
7         System.out.println("a+b:"+ (a+b));
8         System.out.println("a-b:"+ (a-b));
9         System.out.println("a*b:"+ (a*b));
10        System.out.println("a/b:"+ (a/b));
11        System.out.println("a%b:"+ (a%b));
12
13        System.out.println("-----Relational Operators-----");
14        System.out.println("a>b:"+ (a>b));
15        System.out.println("a<b:"+ (a<b));
16        System.out.println("a==b:"+ (a==b));
17        System.out.println("a!=b:"+ (a!=b));
18
19        System.out.println("-----Logical Operators-----");
20
21        int age = 20;
22        boolean ID = true;
23
24
25        if (age >= 18 && ID) {
26            System.out.println("Allowed entry");
27        }
28
29        if (age < 18 || !ID) {
30            System.out.println("Not allowed");
31        }
32    }
33 }
```

```
Run Main
"C:\Program Files\Java\jdk-26.0.1\bin\java.exe" "-javaagent:C:\Program Files\JetBrains\IntelliJ IDEA 2026.1.1\lib\idea_rt.jar=53346" -Dfile.encoding=UTF-8
-----Arithmetic Operators-----
a+b:29.0
a-b:11.0
a*b:180.0
a/b:2.2222223
a%b:2.0
-----Relational Operators-----
a>b:true
a<b:false
a==b:false
a!=b:true
-----Logical Operators-----
Allowed entry
Process finished with exit code 0
```

D) User Input

D. User Input

```
import java.util.Scanner;
```

```
public class Main{
```

```
    public static void main(String[] args){
```

```
        Scanner sc = new Scanner(System.in);
```

```
        System.out.println("Enter first number:");  
        float a = sc.nextFloat();
```

```
        System.out.println("Enter second number:");  
        float b = sc.nextFloat();
```

```
        float sum = a+b;
```

```
        System.out.println("Sum(" + a + "+" + b + ") = " + sum);
```

```
    }
```

```
}
```

The screenshot displays the IntelliJ IDEA IDE interface. The top-left pane shows the project structure with folders `input`, `out`, and `src`. The `src` folder contains `Main.java`. The top-right pane shows the code for `Main.java`, which imports `java.util.Scanner` and defines a `main` class with a `main` method. The method prompts the user for two numbers, reads them, and prints their sum. The bottom pane shows the output of the program, where the user has entered `28.93` and `73.63`, resulting in a sum of `102.56`. The process finished with exit code 0.

```
1 import java.util.Scanner;
2
3 class main{
4     public static void main(String[] args){
5         Scanner sc = new Scanner(System.in);
6
7         System.out.println("Enter the first number :");
8         float a = sc.nextFloat();
9
10        System.out.println("Enter the second number :");
11        float b = sc.nextFloat();
12
13        float sum = a+b;
14
15        System.out.println("Sum("+a+"+"+b+"):"+sum);
16    }
17 }
18 }
```

Run main x

"C:\Program Files\Java\jdk-26.0.1\bin\java.exe" "-javaagent:C:\Program Files\JetBrains\IntelliJ IDEA 2026.1.1\lib\idea_rt.jar=57100" -Dfile.encoding=...
Enter the first number :
28.93
Enter the second number :
73.63
Sum(28.93+73.63):102.56
Process finished with exit code 0

<-THANK YOU->
